PROFESSIONAL SUMMARY

Software Engineer with production experience in Node.js REST APIs, backend development, and full-stack applications, plus hands-on debugging, root-cause analysis, and regression testing. Strong in Java, Spring Boot, Spring Security, SQL, JWT/RBAC, Redis, Docker, and event-driven workflows, with project experience in Spring AI, RAG, and LLM-integrated applications. Solved 500+ DSA problems.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, C++, SQL
Backend: Spring Boot, Spring Data JPA, Hibernate, Spring AI, Node.js, Express.js, REST API Design, JWT Authentication, RBAC, MVC Architecture
Frontend: React.js, Next.js, React Hooks, HTML5, CSS3, Tailwind CSS
Databases: MySQL, PostgreSQL, MongoDB, Redis, Chroma (Vector DB)
Cloud & Developer Tools: AWS, Docker, Git, GitHub, Postman, Flyway, WebContainers
Testing: JUnit, Mockito, Unit Testing, Integration Testing, Regression Testing, Postman
Software Engineering: Data Structures ans Algorithms, OOP, DBMS, Debugging, Root-Cause Analysis, Agile, SDLC
Generative AI: RAG Pipelines, Vector Databases, Embeddings, LLM Integration, Prompt Engineering, Structured Outputs

EXPERIENCE

Software Developer Intern (May 2025 – Jul 2025)
DineGo Technologies, Hyderabad

- Developed 15+ REST API endpoints using Node.js, JavaScript, and SQL, contributing to the backend of DineBees, a social dining and hangout platform.
- Contributed to the Hangout API, implementing backend functionality for hangout creation, discovery, and joining, including request validation, data handling, and participant management workflows across 3 core user journeys.
- Optimized Hangout API database access by eliminating duplicate data lookups and tightening SQL query paths; improved data consistency and API reliability, with fixes verified through regression testing of hangout creation, discovery, and joining workflows.

PROJECTS

StockPilot AI – Inventory Management System Github
Java 17, Spring Boot 3, Spring Security, Spring AI, JWT, RBAC, MySQL, Redis, Chroma, Flyway, React 18, TypeScript, Docker

- Built inventory and procurement workflows covering product and warehouse management, stock transfers, purchase orders, receiving, inventory synchronization, and transaction audit logs.
- Implemented Controller–Service–Repository architecture, JWT authentication, RBAC, Flyway database migrations, and Docker Compose for containerized execution.
- Developed inventory intelligence using moving averages, exponential smoothing, stockout-risk analysis, reorder recommendations, and Z-score anomaly detection; integrated read-only AI assisted workflows with RBAC-scoped tools and validated backend behavior with 27 passing tests.
- Integrated RAG-based document retrieval using Spring AI, Chroma, and OpenAI embeddings for product and inventory-policy documentation; implemented Redis cache-aside caching with invalidation on stock updates, transfers, and purchase-order receipts, reducing p95 product-lookup latency by 64% (180 ms to 65 ms) and 68% fewer database queries under read-heavy workloads.

FinSight – Financial Data Aggregator & Stock Tracker Github
Next.js, TypeScript, MongoDB, Finnhub API, Inngest, Nodemailer

- Built a Next.js and TypeScript financial analytics platform integrating real-time and historical data for 30+ equities using the Finnhub API.
- Developed 10+ backend API endpoints for stock data, persistent watchlists, and price alerts; orchestrated scheduled refreshes and alert evaluation with Inngest, delivering email notifications through Nodemailer.

Code Editor Pro – AI-Powered Modular Web IDE Github
Next.js, TypeScript, Google Gemini API, Monaco Editor, WebContainers, Prisma, MongoDB, NextAuth.js, xterm.js

- Built a browser-based IDE using Next.js, Monaco Editor, xterm.js, and WebContainers, enabling in-browser Node.js execution and live development servers.
- Integrated Gemini-powered code assistance, Google and GitHub authentication, and a Prisma/MongoDB-backed persistent file system with invite-based collaboration.

EDUCATION

CMR Technical Campus, Hyderabad, Telangana (Nov 2022 – Jul 2026)
B.Tech in Computer Science And Engineering (CSE), CGPA: 8.19 / 10.0

POSITION OF RESPONSIBILITY

Codeoholics Community, CMR Technical Campus (Mar 2025 – Jul 2026)
VICE PRESIDENT

- Led a coding community of 50+ members and conducted workshops on Java, API development, and software engineering fundamentals.
